## The Semitic root lak, to press

Im my paper on Heb. melkh, counsel, I stated (above, p. 55) that the stem malak, to deliberate, was derived from the root lak which appears in Arab. lâka, ialûku, to chew (or champ, as a horse on his bit) so that malak, to deliberate, is originally to chew or ruminate in the sense of to deliberate. The primary meaning of the root is preserved in Arab. malaka 'l-'ajîna, to knead (i. e. to press, squeeze, thump), the dough. But alaka 'l-lijâma stands for 'alaka, whereas alaka, to send, is a transposition of la'aka, to send, from which we have mal'ak, 'aγγeλos.

To chew — to press between the teeth. The original meaning of the root lak is to press. This may mean also to thrust, push, strike or to urge, strive eagerly. We find these meanings in the Arabic stems lakka, laka'a, lakata, lakata, lakada, lakaza, lakaša, lakada, lakaća, lakama, lakina, lakita, and in the modern Arabic laklak and lakaf. Also tahâlaka 'alâ šai'i" (cf. laki'a or lakita bi-šai'i" — uali'a bihi au lazimahu) must be derived from this root. Cf. also Ethiop. lak'a, to impress, inscribe. For Heb. hišlîk (from šalak, a causative of the root lak; see GB<sup>16</sup> 795°, below) cf. Arab. lagiha and lagifa.

Allied roots are laq, lah, lax; also lat, laţ, laẓ. The root laq appears in lâqa, laqqa, laqiha, laqaza, laqisa, laqata, laqa'a, laqifa, laqlaqa, laqima, laqija, ualaqa, halaqa, halqama, šalaqa. Also laqina, to understand readily, means originally to swallow; cf. French il faut lui mâcher tous ses morceaux, i. e. you must explain to him the simplest thing. Heb. jälq, locust, is derived from the same root.

The root lah appears in aláhha, lahaba, lahaza, lahhaça lahata, alhafa, lahana fi-'l-qirâ'ati. Heb. löhî, jaw, means originally mâchoire (cf. JBL 33, 292). For the root lax cf. laxxa fi-kalâmihi, laxaba, laxafa, laxama. Derivatives of the root lat are latta, lata'a, lataba, lataha, lataxa, latada, lataza, latağa, latama. For the modern latlat - ratrata cf. lakina which means originally to chew the words. In German, Worte or Silben kauen means to utter or pronounce with hesitation or imperfectly, to articulate indistinctly (French machonner ses paroles).

The root lat is found in latta, latata, latata, latasa, lata'a, latama, latija. For laz cf. lazza and lazaha. See my remarks in AJSL 22, 205. 257; 23, 241. 248. 252; GK<sup>28</sup>, p. 107, n. 1.

## Heb. sed, haughty - Assyr. siltu, remnant

In GB<sup>16</sup> Heb. W or W is combined with Assyr. çâdu (impfiçûdu) to glow; but this etymology (suggested by Jensen, KB 6, 390) is untenable. It is true, the l'instead of "might be due to partial assimilation as in Syr. PW, righteous — PW (JAOS 28, 116) or W, echo in the Siloam Inscription (ZDMG 65, 565, 1) — مدى , but the etymological equivalent of Heb. W - Arab. (14) in Assyrian is sîttu, remnant.

I pointed out above (p. 56) that Heb. NOR, to induce or seduce is a byform of TOR, from ND, whereas GB<sup>18</sup> s. v. MD refers to Delitzsch's theory that NOR means to induce a person to change his mind, alter his opinion (he altered him = he converted him, persuaded him). According to AL<sup>5</sup> 172<sup>\*</sup> situ (which would be a form like mitu, dead, or nixu, quiet = mauitu, nauixu) means other, plur. situti, the others, and situ (a feminine form of situ) denotes remnant, remainder; but this explanation is unsatisfactory.

Nor can we assume that sittu stands for sirtu — si'ratu — , although we have for provide (ZDMG 69, 168, 21) the form provide a prears in Hebrew as THU, consequently we must have a U in Assyrian (JAOS 28, 115). For the same reason Schrader's explanation that sittu corresponds to (KAT<sup>s</sup> 576) is impossible, since we appears in Hebrew as NU.
