#### JACOB'S WELL.

ONE of the few sites in Palestine, the identity of which has never been assailed, is that of Jacob's Well. It is situated a mile and a-half east of Nablus, on the edge of the Plain of Mukhna, and at the eastern base of Mount Gerizim. Captain Anderson, who examined it in 1866, cleared out the mouth, and was lowered by a rope to the bottom. He found it 75 feet deep, of a circular form, with a diameter of 7 feet 6 inches, and lined throughout with rough masonry. The bottom of the well was perfectly dry (in May), but the presence of a small unbroken pitcher proved that water is sometimes found in it. Captain Anderson thinks, however, that the well—into which every visitor throws a stone—was formerly very much deeper. Besides the stones, the débris of a ruined church, built over the well in the fourth century, have fallen into it and helped to fill it up. An offer has been made by Dr. Nathaniel Rogers, of Exeter, one of the subscribers to the Fund, to contribute the sum of £50 towards the complete clearing out of this well, so rich in Scriptural associations. The Committee have accepted his offer, and propose to perform this work on the return of the Survey party. It is estimated that an additional £50 will be required for the labour, making £100 in all; and it will be expedient to have the work superintended by the English officers of the Fund. When cleared out, however, steps should be taken to prevent its being filled up again, and the Committee would like to surround the mouth of the well with some sort of memorial stone-work, the nature and design of which will be a matter for careful consideration. Should any subscribers desire to unite with Dr. Rogers in this interesting piece of work, their names will be gladly received by the Committee.
